DiMX - Casambi enabled DMX controller

Description

DiMX is a Casambi-enabled wireless controller that supports up to 12 channels DMX-512 dimmer.

DiMX enables the connection of the DMX-512 Master controller to the Casambi network.

DiMX can also be connected directly to DMX-controlled fixtures and devices such as Lumenetix CMT and ALM, each device will be controlled individually through the Casambi App.

DiMX supports RGB/RGBW/Tuneable White/ HSL.

Control

DiMX can be controlled and configured by the Casambi free App.
Multiple DiMX devices can be used in the same area/network.
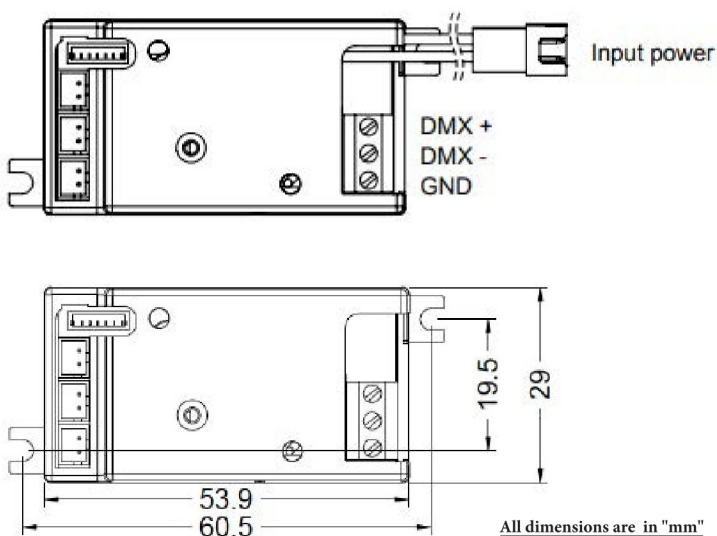

Installation

DiMX can be installed remotely or integrated into fixtures.
Dimx works with a 12-36VDC class 2 power supply unit.
